

this email is to express my feelings towards the current issues concerning XM Instant Traffic & Weather. I pay a monthly fee for a service much like any person paying for cable tv or satellite tv. i receive my weather and my traffic from my XM service just as any one listening to an AM or FM station or watching their TV. if you take away instant weather and traffic from the XM Instant Traffic & Weather service. you must also remove it from the Internet all forms of TV and from AM and FM radio. please do not bully XM satellite Radio instead purchase it for your Vehicle and enjoy the Quality and Convenience of it especial enjoy the instant weather and traffic that it offers you. please think long and hard about your decision; remember there are many people who vote for you who depend on their XM Instant Traffic & Weather every day.

Sincerely
Jason M. Godin
